Dear Sirs,

My goal is to work within a design team and be a valuable, contributing member of that team.

My greatest strengths as a designer, are my ability to listen and mimic any look and feel the art director or client wants, thus offering a wide range of options to bring their ideas to life. I can do fun and playful as easily as elegant and slick. I also have a strong background in the fine arts and have some very solid drawing skills to bring to the table.

You will find me to be someone who has a positive disposition, works well with others and can take direction and feedback with professional grace.

My online portfolio is; [www.graphicscafe.net](http://www.graphicscafe.net),

Sincerely Yours,

Kay Babineau

# Need More Design Solutions?

I have always known, that I wanted to spend my life in the world of art. I knew this the first time that I was handed some crayons as a child. I have come a long way since then, but feel just as sure and enthusiastic about every project that comes along.

I enjoy the problem solving, marketing strategy, client presentation, working with others, the finished project and then moving on to the next challenge. Small jobs or large, they all have something to challenge me and help me to grow as a designer.

I enjoy graphic design immensely and I believe this shows itself in my work and how happy my customers are with their completed projects.
